PRODUCT DESCRIPTION

KARASPRAY activates plant metabolism, can increase resistance to insects (Phytoalexins) and is 100% natural. This results in healthy vigorous plants. Can be applied in an integrated pest management program (IPM) along with organic and synthetic fertilizers to optimize plant development through the various growing stages. Several applications are usually necessary depending on crops and climate.

APPLICATION - Field

Fruits, vines, cereals, pulses, vegetables, flowers, hydroponics and lawns.

ADDED BENEFITS

- Elicits the production of phytoalexins
- Contributes to improve the health of plants
- Activates the metabolic system in the plant
- Will assist to increase the plant's resistance to insects
- Reduces the dependency on traditional agrochemicals
- Safe to use – 100% natural ingredients/>98% biodegradable (OECD compliant)
- Non-toxic and non-corrosive
- Complies with organic regulations

COMPOSITION

Deminerlized Water, Glycerine, De-natured Ethanol, Phyto Concentrate BC which comprises of: Citrus Aurantium Amara Extract, Lactic Acid, Citric Acid, Malic Acid, Caprylic Acid

DIRECTIONS FOR USE

Recommended dilution: Apply at a rate of 200ml/100L water once every 14-21 days, minimum 1L/ha (for vegetables at 2-leaf stage onwards). Phytotoxicity might occur when applied together with high doses of nitrogen. Add pH buffer to water if necessary (up to pH 3-5). Shake well before use.

PRECAUTION

Do not apply in the heat of the day. Do not apply if rain is expected in 6-8 hours. If rain occurs, reapply after rain ceases, apply when leaves are dry.

HEALTH & SAFETY

Although **KARASPRAY** is non-hazardous, it is recommended that when handling the neat concentrate preventative measures should be taken, i.e. wear protective clothing, gloves and goggles to prevent skin and soft cavity sensitization.

STORAGE INFORMATION

Keep out of reach of children, avoid contact with eyes, store in cool dry place in original sealed containers, above 0°C. Expiry date, use within 2 years of opening.
